

## DARK FIBRE IN THE UNIVERSITY AND HALLS OF RESIDENCE UNIVERSITY OF BRADFORD - PROJECT BRIEFING

“...SCD completed the installation and termination of optical fibres on these projects within the extremely tight timescale set by our Estates Department. It is good to know that we have found a contractor we can rely on when we need to at such short notice.”

# University of Bradford

## *Dark Fibre in the University and Halls of Residence*

Bradford has always been a forward-thinking, modern and student orientated University. They have a firm commitment to confronting inequality and celebrating diversity.

Their mission of 'Making Knowledge Work' means students' future is a top priority. This is complimented with their excellent facilities, networking infrastructure and staff, Bradford is a first-class university.

They are constantly investing in the campus and facilities to ensure all students have a world-class teaching and learning environment and state-of-the-art facilities.

Our relationship with Bradford University goes back to 1988.

It started when multimode optical fibre was being implemented as the strategic and “futureproof” communications medium.

The basic philosophy and process of implementation established initially has been maintained and refined over the years (especially with the introduction and adoption of single mode fibre).

The University now benefits from its comprehensive, diverse and resilient fibre network throughout the Campus and Halls of Residence.

### Project Summary

- Civil Engineering:
  - ◇ Telecommunications grade duct network throughout the campus estate and on the public highway
  - ◇ Full liaison with local authority highways department
  - ◇ Section 50 licensing
  - ◇ Project management
- Optical Fibre Cable:
  - ◇ Private optical fibre
  - ◇ Full installation, termination and testing
  - ◇ CCTV project
  - ◇ Maintenance and support
